

Listing of Claims:

Claim 1 (currently amended) ~~Apparatus~~ An apparatus for producing jumbo rolls during the production of coated abrasive products, ~~characterized in that~~ comprising a heating apparatus is connected directly before or to the winder for the pre-cured abrasive belt, ~~with which apparatus~~ whereby the belt is heated to a uniform temperature over its entire width.

Claim 2 (currently amended) ~~Apparatus according to~~ An apparatus of Claim 1, ~~characterized in that~~ wherein the heating apparatus is a thermal radiant heater, which irradiates the abrasive belt uniformly over its entire width before reaching the winder.

Claim 3 (currently amended) ~~Apparatus according to~~ An apparatus of Claim 1, ~~characterized in that~~ wherein the heating apparatus is a thermal radiant heater which in each case irradiates a section of the outer path of the abrasive belt over its entire width on the winder.

Claim 4 (currently amended) ~~Apparatus according to~~ An apparatus of Claim 1, ~~characterized in that~~ wherein the heating apparatus is a recirculating oven, through which the abrasive belt passes.

Claim 5 (currently amended) ~~Apparatus according to~~ An apparatus of Claim 1,
~~characterized in that~~ wherein the heating apparatus is a short-wave or microwave heating
apparatus, through which the abrasive belt passes.

Claim 6 (currently amended) ~~Apparatus according to~~ An apparatus of Claim 1,
~~characterized in that~~ wherein the heating apparatus is a heated roll, over which the
abrasive belt is guided.
